

Forestry weed control with Roundup Biactive

Why use Roundup Biactive?

- Roundup Biactive consistently gives superior results because of its outstanding uptake and translocation in all weeds.
- Roundup Biactive is a complete product and does not require added surfactant – even at low rates.
- Roundup Biactive provides even better rainfastness, a key advantage in Irish weather conditions.
- Roundup Biactive gives long-lasting control of perennial weeds, as well as all the major annual weeds.
- Roundup Biactive is safer for the operator, livestock and wildlife.
- Roundup Biactive is backed by Monsanto's guarantee and over 20 years manufacturing experience.
