

TIMBER GROWERS ARE SUPERHEROES

You've helped engage the wider public on the multi-use benefits of forestry

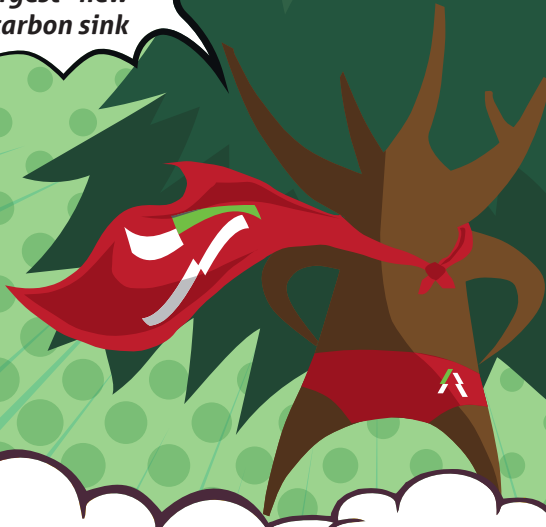

You've made a huge contribution to recreation, and undoubtedly the mental health of our population

You've helped increase forest cover from 1% to 10% in the past century

You laid the foundations for an indigenous industry supporting more than 10,000 rural jobs

You created habitats to protect and enhance many species including red squirrels and several birds of prey, and you have enhanced our islands biodiversity

You've created this islands largest "new" carbon sink

Thank you for all you do - We continue to learn and benefit from your knowledge. Like any true superhero - hiding in plain sight but in your case saving the planet one tree at a time!
